Hive Notes – Microphone Guide

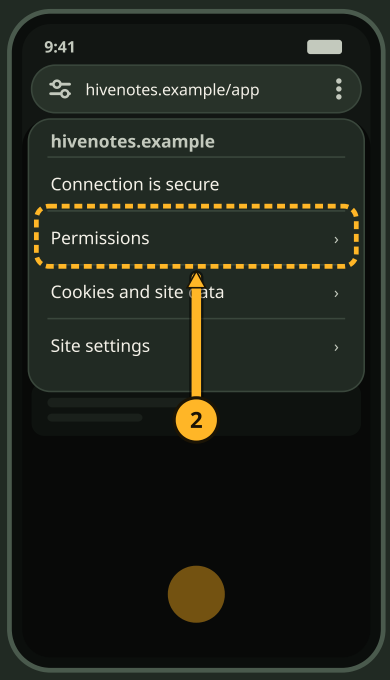

Allow the microphone once and it remembers.

Illustrations only – menus may look slightly different on your phone or browser version.

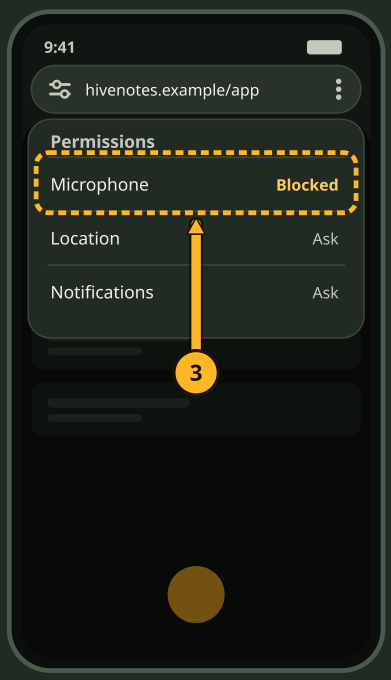

1. Chrome on Android

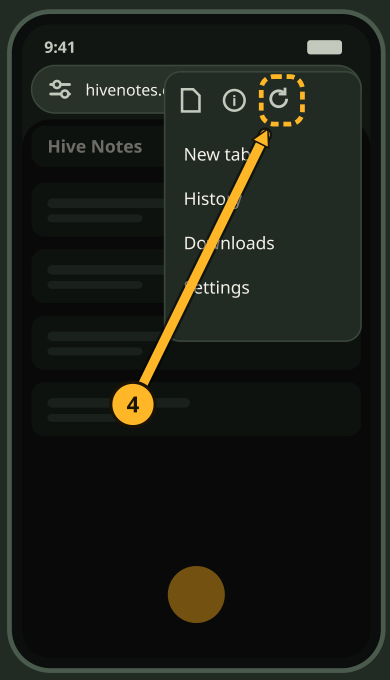

Step 1. Tap the small icon at the far left of the address bar (tune or padlock icon).

Step 2. Tap Permissions (on some versions: Site settings).

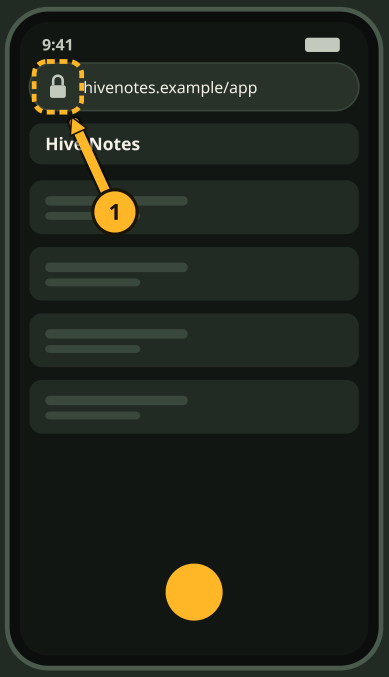

Step 3. Tap Microphone and choose Allow (or switch it on).

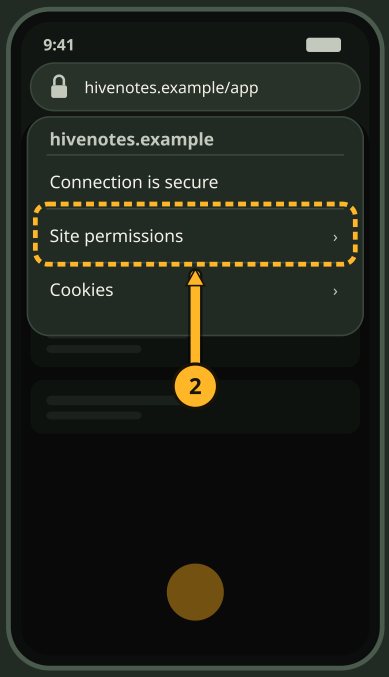

Step 4. Reload the page: tap ⋮ (top right), then the reload arrow ↻. Then tap the mic again.

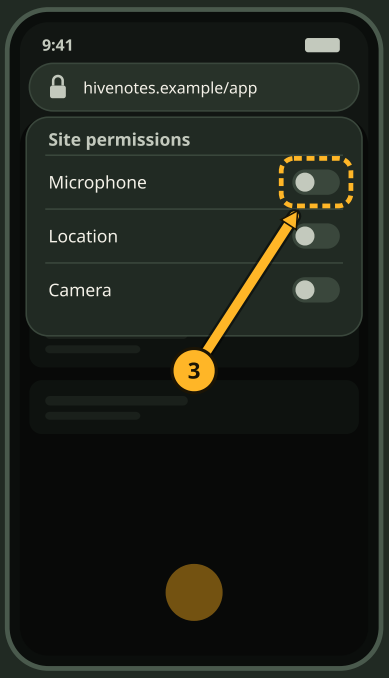

2. Samsung Internet

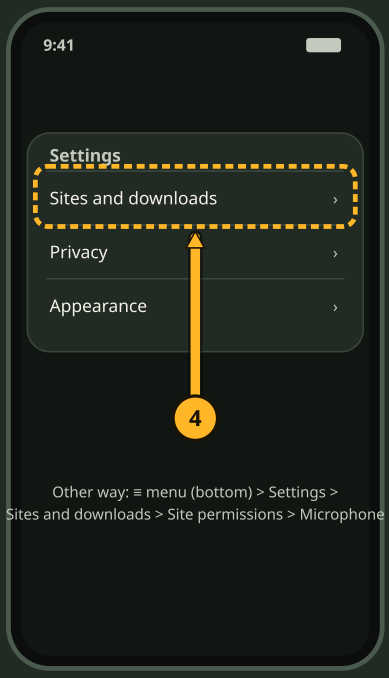

Step 1. Tap the padlock at the left of the address bar.

Step 2. Tap Site permissions (or Permissions).

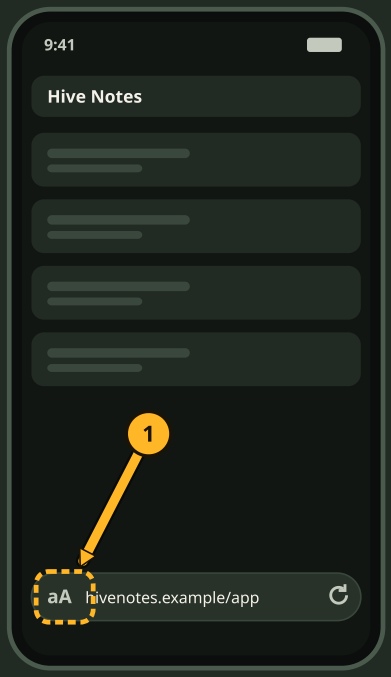

Step 3. Turn Microphone on (Allow), then reload the page.

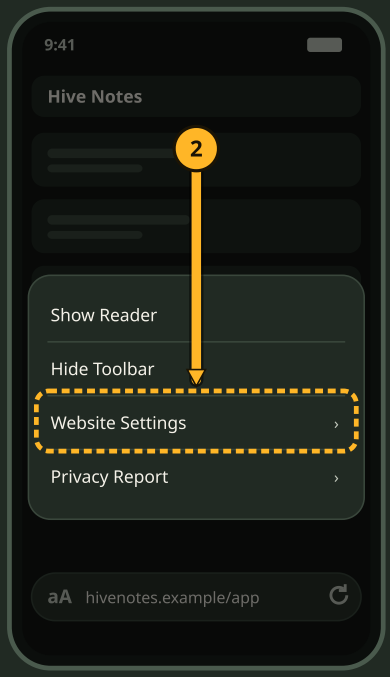

Step 4. Other way: ≡ menu > Settings > Sites and downloads > Site permissions > Microphone.

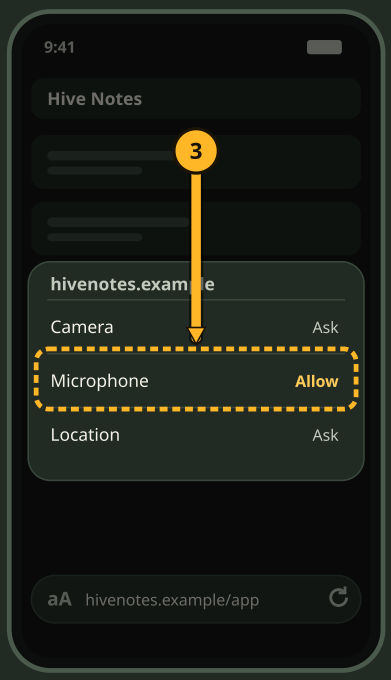

3. Safari on iPhone

Step 1. Tap the aA icon at the left of the address bar.

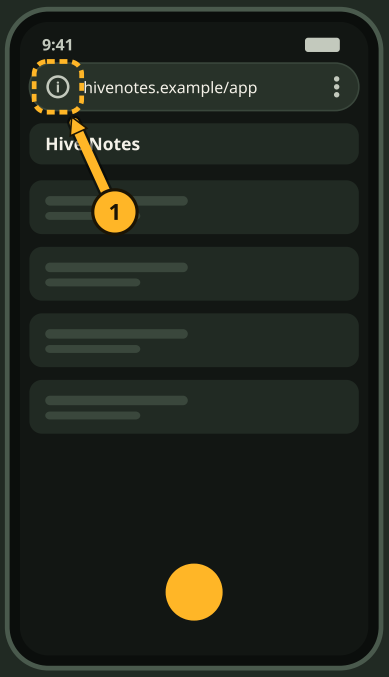

Step 2. Tap Website Settings.

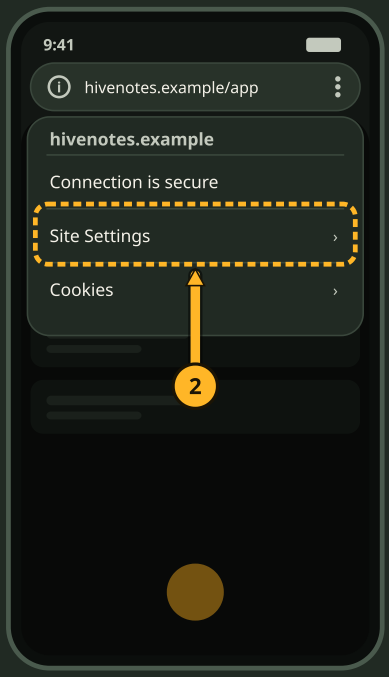

Step 3. Tap Microphone and choose Allow. Tap Done, then reload.

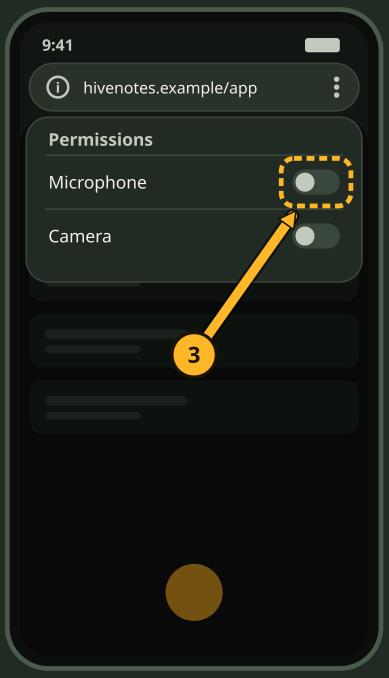

4. Chrome on iPhone

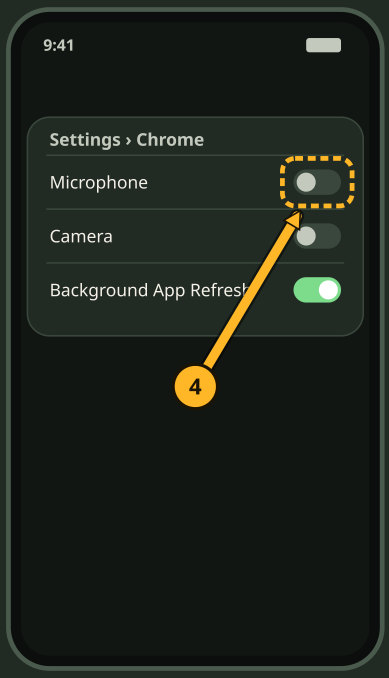

Step 1. Tap the icon at the left of the address bar.

Step 2. Tap Site Settings (or Website Settings / Permissions).

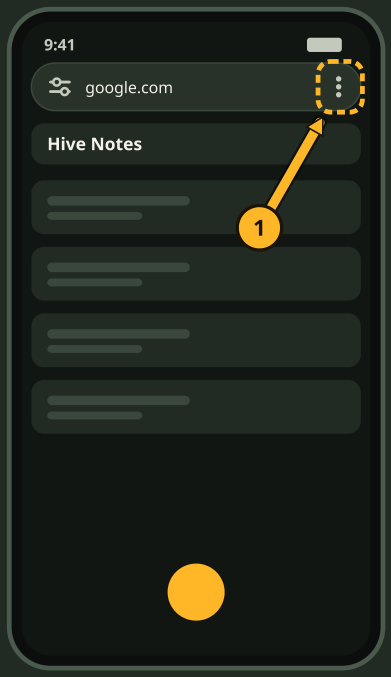

Step 3. Switch Microphone on (Allow), then reload.

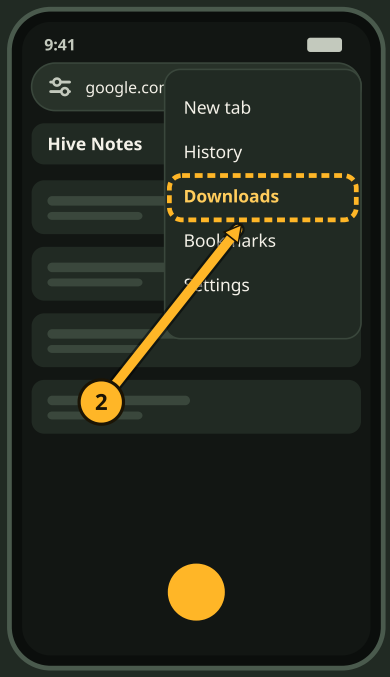

Step 4. If it still fails: iPhone Settings > Chrome > turn Microphone on.

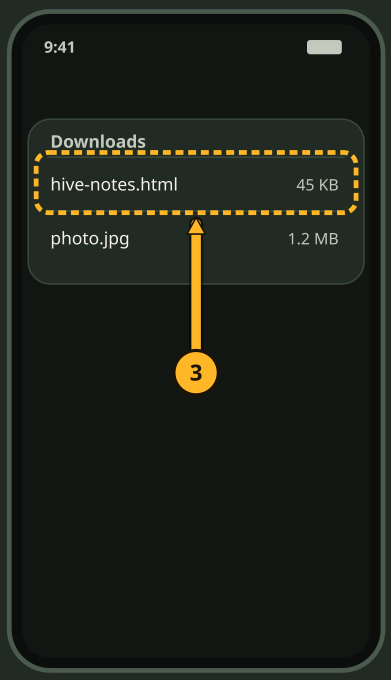

5. Opened as a file

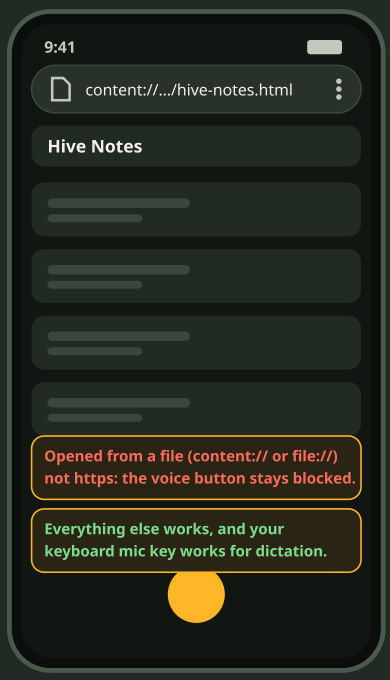

Step 1. Chrome: tap ⋮ at the top right.

Step 2. Tap Downloads.

Step 3. Tap hive-notes.html so it opens as a page in Chrome.

Step 4. Honest note: a downloaded file opens as file:// or content://, not https, so the app's voice button stays blocked. Use the keyboard mic, or open the app's https web link for voice.
